NOTICE OF REVIEW OF AN ALASKA POLLUTANT DISCHARGE ELIMINATION SYSTEM (APDES) PRELIMINARY DRAFT GENERAL PERMIT TO DISCHARGE TO WATERS OF THE UNITED STATES

ADEC has prepared an APDES preliminary draft for the reissuance of the Excavation Dewatering General Permit. Prior to the formal 30-day public notice period, ADEC invites you to review the preliminary draft general permit, fact sheet, and associated documents. You can access the documents from ADEC's Wastewater Discharge Authorization Program web page at:

<http://dec.alaska.gov/water/wastewater/>.

Preliminary Draft General Permit Review:

Start Date: 06/07/2019

End Date: 06/20/2019

Permit No.: AKG002000

Proposed Permit Coverage:

Dewatering discharges eligible for coverage under the general permit would consist of water pumped from excavation areas through the use of temporary dewatering wells or submersible pumps to lower the water table to support a construction activity. The dewatering of accumulated groundwater and storm water which may accumulate within an excavation area is an authorized discharge under the permit. This permit does provide discharge authorization for dewatering conducted within 1,500 feet of a permit defined "DEC-identified contaminated site" although special permit conditions apply and additional requirements may be added in the discharge authorization. The special conditions will provide assurance that the dewatering activities don't impact the known contaminated sites.
